- Implemented responsive design, leading to a 50% decrease in bounce rate and a 35% increase in session duration.

Technologies and Skills Used: HTML, CSS, Jira, Git, Figma

PROJECTS

TRAVEL2GETHER

- TRAVEL2GETHER is a web application project to allow travelers to find new places here for you.
- As a Full Stack Developer, my primary focus was implementing frontend features, I built Travel2gether on the robust MERN stack (MongoDB, Express.js, React, Node.js) and adhered to agile methodologies, prioritizing user security through token usage.
Technologies used: React.js, JavaScript, Node.js, Express.js, MongoDB, Mongoose, Jest, Bootstrap, and robust authentication and authorization mechanisms via JWT.

DREAM ESTATE

- You can find the house you want to buy on this website by filtering, sorting and houses on the map. Listing is also possible if you want to sell.
- Dream Estate is a full-stack real estate application which uses MERN stack (MongoDB, Express.js, React, Node.js) designed to provide a seamless property browsing experience. This project showcases a rich set of features and technologies, making it a comprehensive demonstration of my skills as a Full Stack Developer.
- **Technologies used:** React.js, Redux, JavaScript, Node.js, Express.js, MongoDB, Mongoose, TailwindCSS, Leaflet, Responsive design, filtering, pagination
